Company Profile :

Electrofab Engineering Services Pvt. Ltd. is Developing as a world - wide brand in the crane manufacturing industry. We have Consistently maintained our commitment to deliver world- class material handling solutions in the lowest possible lead times.

- We are Incorporated in 2006 as a partnership firm
- Become private limited entity in 2015
- Employee strength 60 +

We Deal in Overhead Material Handling likewise

- Electric Overhead Crane
- Jib Crane
- Goliath Crane
- Underslung Crane
- Chain Hoist
- Rope Hoist
- Light Rail system
- Annual Maintenance Contract (Any Make)

We supply products of top quality with latest technology at competitive prices.

We believe that satisfied customers only give us more business hence our prime objective is "CUSTOMER SATISFACTION".

EOT(Electrical overhead traveling crane)

EOT & HOT Crane

Overhead crane also called bridge cranes, are cranes with a hoist travelling along a bridge between parallel tracks.

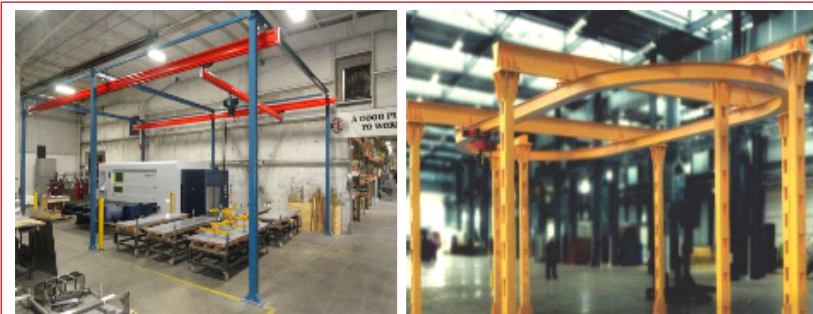

These cranes are designed to handle medium to heavy industrial lifting applications.

These cranes are used in a variety of application, from simple workplace solution to complex automation requirement.

We provide both electric (EOT) and Hydraulic (HOT) Overhead Travelling Crane solution and specialise in:

- Double Girder EOT with Fixed Electric Hoist
- Double Girder EOT with AN OPEN Winch crab
- Single Girder EOT with Wire Rope Electric Hoist

LIGHT RAIL / MONORAIL SYSTEM

- Available in Single girder & Double girder
- Capacity :- 125 Kg To 2000 Kg
- Curved type monorail application is Possible
- Available in Multiple girder system
- Track available in internal bus bar system also

**Straight Monorail
Curved Monorail**

JIB CRANE

Available in different heights and capacities, Jib cranes are used for loading & unloading heavy machines, Material and high assembly work. These cranes consume less floor space and can be easily mounted on any existing structure.

We manufacture a wide verity of jib cranes that can be floor or foundation mounted, wall mounted or cantilevered, to suit your specification. foundation mounted jib crane have higher load rating then wall mounted Jib Cranes, and cantilevered jib cranes can have full or partial rotation.

GOLIATH CRANE

Goliath Cranes

Our heavy duty Goliath cranes are perfectly suited for heavy-load industries and project applications in work places lie maintenance chargers , water work, railway yards, factories, power- station and harbours. Moreover these are also ideal for material handling in warehouse, Construction sites, heavy fabrication units , mines , quarries and transport firms. these cranes are typically used for unloading and despatching equipment for a variety of application . we also manufacture semi goliasth crane which are used for material handling in a confined area. We provide both single girder and double girder models.

UNDERSLUNG CRANE

Our exclusive rang of under slung cranes are designed to handle heavy loads for a long duration of time. Our cranes are used in a host of industrial material handling operations, especially when the loads to be lifted are more than 5 tons. Designed with precision, our under slung cranes are robust, durable and resistant to high temperatures and corrosion.

OUR PRODUCT

- Carlstahl make Electric Chain Hoist
- Carlstahl make Wire Rope Hoist
- E.M.H make Electric Chain Hoist
- E.M.H make Wire Rope Hoist
